PROCESS

The first stage of this review was to compare the original search string to the targets listed under the Sustainable Development Goal (SDG).

SDG targets listed here: <https://sustainabledevelopment.un.org/sdg11>

The purpose of this stage was to understand whether the Scopus results correctly reflected the theme of the SDG. The SDGs were unanimously agreed by member states of the United Nations, with very deliberate language and scope/ exclusions, so the results of this analysis should accurately reflect the specific SDG themes.

The SDG theme focusses on **enhance quality of life in urban areas**, either cities or settlements. Specific focus is given to the protection and inclusion of **vulnerable population segments** such as women, children, elderly and disabled persons. **Safe and affordable housing** should be promoted, reducing the amount of people living in slums, as well as the **accessibility and affordability of sustainable public transport**. The number of **people affected by natural disasters** should be minimised and **environmental impacts of cities** (among which waste management and air quality) **should be reduced**, the accessibility of safe, **inclusive green and public spaces** should be promoted. **Inclusive and participatory planning and management structures** are promoted, as well as the **protection and safeguarding of cultural and natural heritage**.

A Scopus search was conducted using the original search string. This returned 544,657 document results.

The top 20 cited articles were reviewed. 17 of the 20 articles do not closely reflect the theme of the SDG. Specifically, many articles related to studies on medicine or disease, engineering or relevant topics such as air pollution but which are not specified towards urban environments.

Top 20 most cited articles listed in Scopus from the original search string:

*red text shows articles which do not closely match the theme of the SDG

Documents by subject area

Documents by subject area

The charts show that the original search query retrieves articles in a diverse variety of fields. The theme of the SDG is quite diverse, with fields of 'engineering', 'social sciences', 'environmental sciences' and 'computer sciences' (due to the upcoming of the smart city technologies) producing all sorts of relevant articles. A significant amount of papers relates to the field of 'medicine', which is confirmed by the top 20 most cited and the 20 randomised articles. The 'other' field, with elements such as 'biochemistry', 'chemistry' also accounts for a large bulk of articles that are not directly relevant for the theme of the SDG. The query will need to be cleaned up to provide more relevant findings.

Update 1) The search keywords were edited to remove the broader search terms, or to make them more specific by combining with other search keywords.

The purpose of this update was to rewrite the query and remove / rewrite broad search terms, missing keywords will be added at a later stage.

Original search string: 544,657 document results

TITLE-ABS-KEY((city OR cities OR {human settlement} OR {human settlements} OR gentrification OR congestion OR transportation OR {public transport} OR urban OR metropoli* OR town* OR municipal* OR housing OR slum* OR urbani?ation OR {sendai framework} OR {Disaster Risk Reduction} OR {DRR} OR {smart village} OR {smart villages} OR {resilient building} OR {resilient buildings} OR {sustainable building} OR {sustainable buildings} OR {building design} OR {buildings design} OR {zero energy building} OR {zero energy buildings} OR {zero-energy building} OR {zero-energy buildings} OR {basic service} OR {basic services})) AND PUBYEAR BEF 2018 AND PUBYEAR AFT 2012

Rationale for edits to the search keywords:

<u>query term</u>	<u>decision</u>	<u>Rationale</u>
Congestion	Deleted	Part of transportation, not necessary as a separate keyword (cleaning up query and a bulk of keywords will be added later on, thus ensuring readability)
Smart city	Changed from {smart village}	Smart city is the common and well-accepted term to indicate any improvements / elements related to sensors, technology in an urban environment
Smart cities	Changed from {smart villages}	Smart city is the common and well-accepted term to indicate any improvements / elements related to sensors, technology in an urban environment

In addition, the query has been rewritten to ensure that all keywords listed in the query are related to topics on urbanisation, urban settlements, etc: by moving all elements related to urban characteristics / forms (urban, city, town, municipality, etc) to an (city OR cities OR {human settlement} OR {human settlements} OR urban OR metropoli* OR town* OR municipal*) AND further keywords element. This should ensure that all keywords, and keywords that will added in later versions, are linked to an urban setting and thus to the theme of SDG 11.

Updated search string (first update): 61,273 document results

TITLE-ABS-KEY ((city OR cities OR {human settlement} OR {human settlements} OR urban OR metropoli* OR town* OR municipal*) AND (gentrification OR congestion OR transportation OR {public transport} OR housing OR slum* OR {sendai framework} OR {Disaster Risk Reduction} OR {DRR} OR {smart city} OR {smart cities} OR {resilient building} OR {resilient buildings} OR {sustainable building} OR {sustainable buildings} OR {building design} OR {buildings design} OR urbani?ation OR {zero energy building} OR {zero energy buildings} OR {zero-energy building} OR {zero-energy buildings} OR {basic service} OR {basic services})) AND PUBYEAR < 2018 AND PUBYEAR > 2012

The results of the updated search were reviewed to check whether they aligned closely with the SDG theme.

The updated search returned 61,273 document results, compared to 544,657 document results for the original search.

The top 20 cited articles were reviewed. Two of the 20 articles are not relevant for the theme of the SDG. One article is primarily about disease and one covers IT, the latter has links with smart cities via keywords, but this relationship could not be found in the abstract. Therefore, this article was excluded.

Top 20 most cited articles listed in Scopus from search string v1:

*red text shows articles which do not closely match the theme of the SDG

In addition, a randomised sample of 20 articles were reviewed taking the same approach. Four of the 20 articles do not closely reflect the theme of the SDG. Specifically, these relate to historical urbanisation processes, online shopping packaging transport and distribution systems and the effects of urbanisation on rural communities. The latter was deemed to be too far off from the theme of the SDG, which focusses on urban communities.

Randomised sample of 20 articles listed in Scopus from search string v1:

Update 2) A second update was made to the search string to cover topics that are currently missing in the results and / or query.

To bring these articles into the search results, the following were added to the search string:

Target	Keywords to be added
By 2030, ensure access for all to adequate, safe and affordable housing and basic services and upgrade slums	INCLUDED
By 2030, provide access to safe, affordable, accessible and sustainable transport systems for all, improving road safety, notably by expanding public transport, with special attention to the needs of those in vulnerable situations, women, children, persons with disabilities and older persons	INCLUDED
By 2030, enhance inclusive and sustainable urbanization and capacity for participatory, integrated and sustainable human settlement planning and management in all countries	'governance' 'citizen participation' 'collaborative planning' 'participatory planning' 'inclusiveness'

Strengthen efforts to protect and safeguard the world's cultural and natural heritage	'cultural heritage' 'natural heritage' 'UNESCO'
By 2030, significantly reduce the number of deaths and the number of people affected and substantially decrease the direct economic losses relative to global gross domestic product caused by disasters , including water-related disasters, with a focus on protecting the poor and people in vulnerable situations	'disaster'
By 2030, reduce the adverse per capita environmental impact of cities , including by paying special attention to air quality and municipal and other waste management	'ecological footprint' 'environmental footprint' 'waste' 'pollution' 'pollutant*' 'waste water' 'recycling' 'circular economy' 'air quality'
By 2030, provide universal access to safe, inclusive and accessible, green and public spaces , in particular for women and children, older persons and persons with disabilities	'green space' 'green spaces' 'nature inclusive' 'nature inclusive building' 'nature inclusive buildings'

Second update search: 112,527 document results

TITLE-ABS-KEY ((city OR cities OR {human settlement} OR {human settlements} OR urban OR metropoli* OR town* OR municipal*) AND (gentrification OR congestion OR transportation OR {public transport} OR housing OR slum* OR {sendai framework} OR {Disaster Risk Reduction} OR {DRR} OR {smart city} OR {smart cities} OR {resilient building} OR {resilient buildings} OR {sustainable building} OR {sustainable buildings} OR {building design} OR {buildings design} OR urbani?ation OR {zero energy building} OR {zero energy buildings} OR {zero-energy building} OR {zero-energy buildings} OR {basic service} OR {basic services} OR {governance} OR {citizen participation} OR {collaborative planning} OR {participatory planning} OR {inclusiveness} OR {cultural heritage} OR {natural heritage} OR {UNESCO} OR {disaster} OR {ecological footprint} OR {environmental footprint} OR {waste} OR {pollution} OR {pollutant*} OR {waste water} OR {recycling} OR {circular economy} OR {air quality} OR {green space} OR {green spaces} OR {nature inclusive} OR {nature inclusive building} OR {nature inclusive buildings})) AND PUBYEAR < 2018 AND PUBYEAR > 2012

The results of the updated search were reviewed to check whether they aligned closely with the SDG theme.

The top 20 cited articles were reviewed. Four of the 20 articles do not closely reflect the theme of the SDG. The increase in irrelevant articles compared to update 1 is due to keywords regarding waste and pollution. The other articles are related to disease and IT.

Urban green space, public health, and environmental justice: The challenge of making cities 'just green enough'	2014	Landscape and Urban Planning	630	2-s2.0-84899128460
The real-time city? Big data and smart urbanism	2014	GeoJournal	623	2-s2.0-84894317469
Integration of Cloud computing and Internet of Things: A survey	2016	Future Generation Computer Systems	608	2-s2.0-84958935292
Elucidating severe urban haze formation in China	2014	Proceedings of the National Academy of Sciences of the United States of America	592	2-s2.0-84917691429
Current trends in smart city initiatives: Some stylised facts	2014	Cities	585	2-s2.0-84892634029
Survey on free space optical communication: A communication theory perspective	2014	IEEE Communications Surveys and Tutorials	581	2-s2.0-84913587515
The use of zero-valent iron for groundwater remediation and wastewater treatment: A review	2014	Journal of Hazardous Materials	571	2-s2.0-84892638811
Nature and health	2014	Annual Review of Public Health	571	2-s2.0-84897052253

In addition, a randomised sample of 20 articles was reviewed. Four of the 20 articles were not closely related to the theme of the SDG. Two articles are not related to the theme, with a focus on bio-energy or biodiesel. Two articles seemed related at first glance, but cover air transport between cities and psychology.

Randomised sample of 20 articles listed in Scopus from search string v2:

*red text shows articles which do not closely match the theme of the SDG

Title	Year	Source title	Cited by	EID
Young adult households and domestic sustainabilities	2015	Geoforum	17	2-s2.0-84937239424
Using watershed-scale hydrological models to predict the impacts of increasing urbanization on freshwater fish assemblages	2015	Ecohydrology	11	2-s2.0-84925290332
Exposure to traffic and lung function in adults: A general population cohort study	2015	BMJ Open	10	2-s2.0-84937239405
Urbanization influence on meteorological parameters of air pollution: Vilnius case study	2013	Baltica	9	2-s2.0-84878987622
Can bioenergy with carbon capture and storage make an impact?	2016	Proceedings of the National Academy of Sciences of the United States of America	8	2-s2.0-84996577267
On the analytical approximation of joint aggregate queue-length distributions for traffic networks: A stationary finite capacity Markovian network approach	2017	Transportation Research Part B: Methodological	6	2-s2.0-85006722271
Robust Optimization on Regional WCO-for-Biodiesel Supply Chain under Supply and Demand Uncertainties	2016	Scientific Programming	6	2-s2.0-84981164867
Does energy follow form? The case of household travel in Jinan, China	2015	Mitigation and Adaptation Strategies for Global Change	5	2-s2.0-84939935611
AIRNET: A Programme for Generating Intercity Networks	2014	Urban Studies	5	2-s2.0-84897091039
Road traffic noise in urban environments in Ahvaz city, Iran	2017	Fresenius Environmental Bulletin	4	2-s2.0-85026891624
Short paper: On the potential of V2X communications in helping electric bicycles saving energy	2013	IEEE Vehicular Networking Conference, VNC	4	2-s2.0-84896817178
Strategic interaction between inter vivos gifts and housing acquisition	2015	Journal of the Japanese and International Economies	2	2-s2.0-84922575537
Analysis of road transport energy consumption and emissions: A case study	2014	International Journal of Energy Sector Management	1	2-s2.0-84988299013
An Analysis on Optimization of Living and Fire Water Supply Systems of Small High-Rise Residential Blocks	2017	IOP Conference Series: Earth and Environmental Science	0	2-s2.0-85038112105
Addressing procedural bias in municipal planning governance: A case for incorporating citizen participation within technical advisory committees	2015	International Journal of Organization Theory and Behavior	0	2-s2.0-84946716370
Evaluation on urban land comprehensive carrying capacity in Xi'an city under the process of urbanization	2015	Open Cybernetics and Systemics Journal	0	2-s2.0-84988472955
The construction on "green commuting" three-dimensional public transportation governance system for Chinese Cities	2015	ISME 2015 - Proceedings of the Information Science	0	2-s2.0-84978734527

The two updates have improved this search query compared to the original search query. Rewriting the search query to increase the focus on the theme of the SDG, as well as the keywords added in the second update, has ensured that the current search query primarily retrieves articles that closely reflect the theme of the SDG. This is confirmed by the analyses as well as by the co-occurrence of terms as visualised above.
