PROCESS

The first stage of this review was to compare the original search string to the targets listed under the Sustainable Development Goal (SDG).

SDG targets listed here: <https://sustainabledevelopment.un.org/sdg16>

The purpose of this stage was to understand whether the Scopus results correctly reflected the theme of the SDG. The SDGs were unanimously agreed by member states of the United Nations, with very deliberate language and scope/ exclusions, so the results of this analysis should accurately reflect the specific SDG themes.

SDG 16 promotes peaceful and inclusive societies by **reducing all forms of violence**, including conflict related violence, human trafficking and violence against children. **Equal access to justice** should be ensure for all and **rule of law** should be promoted. **Organised crime, illicit financial and / or arms flows, corruption and bribery should be combatted**. **Effective, responsible and transparent institutions** should be established, **decision-making should be inclusive, responsive and participatory**. Developing countries should be integrated in **global governance** institutions. Each individual should be entitled to have a **legal identity**, **birth registration** is promoted to ensure such legal identity. **Fundamental freedoms** are to be protected for all, and **information should be publicly accessible**.

A Scopus search was conducted using the original search string. This returned 301,259 document results.

The top 20 cited articles were reviewed. Sixteen of the 20 articles do not closely reflect the theme of the SDG. The majority of these articles relate to the field of medicine. The other articles relate to genetics, mathematics, IT and economic studies. These articles were retrieved through hits on the keywords 'violence', 'war', 'democracy', 'peace', 'homicide' and 'child abuse'.

Top 20 most cited articles listed in Scopus from the original search string:

*red text shows articles which do not closely match the theme of the SDG

In addition, a randomised sample of 20 articles was reviewed. 11 of the 20 articles do not closely reflect the theme of the SDG. These articles were published a variety of fields: healthcare, political studies, IT, social studies, historical studies, linguistic studies and transport studies. Hits were found on the following keywords: 'violence', 'human rights', 'war', 'crime', 'security', 'refugees' and 'democracy'.

Randomised sample of 20 articles listed in Scopus from the original search string:

The general analysis of the document results confirms the findings of the different analyses. Approximately 50% of the document results are retrieved in the fields of 'Social Sciences' and 'Arts and Humanities'. The analyses show that articles retrieved in these fields do not necessarily reflect the theme of the SDG, as indicated by topics related to historical proceedings, democracy studies with an emphasis on economic development, or linguistic studies. The field of 'Medicine' is the third-largest field, which is reflected by the high number of healthcare - and disease related articles in the top 20 most cited. The visualisation of the co-occurrence of terms shows no specific focus on the targets of the SDG yet. Moreover, some keywords in the search query led to hits in a variety of fields unrelated to the SDG. These need to be modified to reduce the number of hits on irrelevant articles.

The analyses show that this search query needs to be improved and specific query terms need to be investigated and revised. This will be the objective of the first update.

Update 1) The search keywords were edited to remove the broader search terms, or to make them more specific by combining with other search keywords.

Original search string: 301,259 document results

TITLE-ABS-KEY((({actual innocence} OR {armed conflict} OR {armed conflicts} OR {civil conflict} OR {civil conflicts} OR war OR wars OR {conflict management} OR corruption OR crime OR crimes OR criminal OR democracy OR democrati?ation OR {ethnic conflict} OR {ethnic conflicts} OR exoneration OR genocid* OR homicid* OR murder* OR {human trafficking} OR {human traffic} OR justice OR refugee* OR terroris* OR violence OR torture OR {rule of law} OR {arms flow} OR bribery OR {transparent institution} OR {transparent institutions} OR {global governance} OR {legal identity for all} OR {birth registration} OR {freedom of information} OR {human right} OR {human rights} OR {fundamental freedom} OR {fundamental freedoms} OR {violent conflict} OR {violent conflicts} OR peace OR {effective institution} OR {effective institutions} OR {accountable institution} OR {accountable institutions} OR {inclusive institution} OR {inclusive institutions} OR {child abuse} OR detention OR prison* OR jail* OR {judicial system} OR tribunal* OR {government budget} OR {government budgets} OR {social services} OR {social contract} OR {social contracts} OR peace OR {inclusive society} OR {inclusive societies} OR {responsible institution} OR {responsible institutions} OR {fair society} OR {fair societies} OR {legal remedy} OR {legal remedies} OR {independence of judiciary} OR {independent judiciary} OR {separation of power})) AND PUBYEAR BEF 2018 AND PUBYEAR AFT 2012

Rationale for edits to the search keywords:

<u>query term</u>	<u>decision</u>	<u>rationale</u>
{false confession}	Added	In addition to {actual innocence}
War	Changed to (war AND (conflict OR warfare OR democracy OR {Geneva Convention} OR treaty OR peace))	This keyword led to hits on historical studies, literature and others, as specific wars (e.g. WWII) are regularly used in the introduction of an article. However, this does not mean that the overall topic of the article reflects the theme of the SDG. Narrowed down by adding an AND operator and additional keywords to reduce hits on irrelevant topics
Wars	Deleted	See {war}
Corruption	Changed to ({corruption} AND ({institution} OR {public official} OR government} OR {bribery} OR {conflict}))	Narrowed down as 'corruption' led to hits on articles in the field of genetics and IT. The updated query term should limit hits in this field and it should retrieve articles that relate to the specific target of the SDG
{democracy}	Changed to {democratic deficit}	Narrowed down to reduce irrelevant hits as {democracy} is a popular keyword in a number of fields
{human traffic}	Deleted	Deleted as this leads to hits on transport systems and {human trafficking} is already part of the search query
Justice	Changed to {social justice} OR {criminal justice system} OR {justice system} OR {arbitrary justice}	Narrowed down to exclude hits on psychology, medicine, economic studies, organisational studies
bribery	Deleted	Added to ({corruption} AND ({institution} OR {public official} OR government} OR {bribery} OR {conflict})), deleted as an individual query term
{global governance}	Changed to {good governance}	{global governance} leads to hits on healthcare, gender disparities and other governance related

		topics. Changed to {good governance} as this concept pursues the enhancement of governance principles (e.g. inclusiveness, effectiveness) in institutions and decision-making
{human right}	Changed to {human rights institution} OR {human right activists}	{human right} retrieves all types of articles that relate to peace and eradication of violence, but also in relation to healthcare and others. Narrowed down to more specific query terms that relate to the targets of the SDG
{human rights}	Deleted	See {human right}
Peace	Changed to {peaceful society} + deleted duplicate	Peace is too broad as a keyword and brings up articles in a variety of fields, ranging from IT to healthcare. Narrowed down
Detention	Changed to {arbitrary detention} OR {unsentenced detention}	Narrowed down to increase hits on articles that directly relate to targets of the SDG
prison*	Deleted	Relevant hits should be provided by the query terms {arbitrary detention} OR {unsentenced detention}, prison* is too broad as a keyword
Jail*	Deleted	Relevant hits should be provided by the query terms {arbitrary detention} OR {unsentenced detention}, jail* is too broad as a keyword
Tribunal*	Changed to {criminal tribunal}	Narrowed down to reduce hits on employment tribunals / tribunals in healthcare
{government budget}	Deleted	Not directly related to any of the targets, deleted
{government budgets}	Deleted	Not directly related to any of the targets, deleted
{social services}	Deleted	Not directly related to any of the targets, deleted
{social contract}	Deleted	Not directly related to any of the targets, deleted
{social contracts}	Deleted	Not directly related to any of the targets, deleted
{responsible institution}	Changed to {responsive institution}	Changed to a keyword specifically outlined in a target
{responsible institutions}	Changed to {responsive institutions}	Changed to a keyword specifically outlined in a target
AND NOT {disease} OR {genetics}		Crucial keywords such as {war} or {violence} retrieved a high number of articles in the field of medicine, not on effects of war but also due to phrases like 'going to war' with a specific disease. The query terms {disease} and {genetics} are excluded to reduce the amount of hits on these articles.

Updated search string (first update): 164,675 document results

TITLE-ABS-KEY (({actual innocence} OR {false confession} OR {armed conflict} OR {armed conflicts} OR {civil conflict} OR {civil conflicts} OR (war AND (conflict OR warfare OR democracy OR {Geneva Convention} OR treaty OR peace)) OR {conflict management} OR (corruption AND ({institution} OR {public official} OR {government} OR {bribery} OR {conflict})) OR crime OR crimes OR criminal OR {democratic deficit} OR democrati?ation OR {ethnic conflict} OR {ethnic conflicts} OR exoneration OR genocid* OR homicid* OR murder* OR {human trafficking} OR {social justice} OR {criminal justice system} OR {justice system} OR {arbitrary justice} OR refugee* OR terroris* OR violence OR torture OR {rule of law} OR {arms flow} OR {transparent institution} OR {transparent institutions} OR {good governance} OR {legal

identity for all} OR {birth registration} OR {freedom of information} OR {human rights institution} OR {human rights activists} OR {fundamental freedom} OR {fundamental freedoms} OR {violent conflict} OR {violent conflicts} OR {peaceful society} OR {effective institution} OR {effective institutions} OR {accountable institution} OR {accountable institutions} OR {inclusive institution} OR {inclusive institutions} OR {child abuse} OR {arbitrary detention} OR {unsentenced detention} OR {judicial system} OR {criminal tribunal} OR {inclusive society} OR {inclusive societies} OR {responsive institution} OR {responsive institutions} OR {fair society} OR {fair societies} OR {legal remedy} OR {legal remedies} OR {independence of judiciary} OR {independent judiciary} OR {separation of powers}) AND NOT ({disease} OR {genetics})) AND PUBYEAR < 2018 AND PUBYEAR > 2012

The results of the updated search were reviewed to check whether they aligned closely with the SDG theme.

The updated search returned 164,675 document results, compared to 301,259 document results for the original search.

The top 20 cited articles were reviewed. Eight of the 20 articles do not closely reflect the theme of the SDG. These articles cover topics related to economic studies, healthcare, IT and video games. The articles were retrieved by hits on the keywords 'war AND democracy', 'war AND peace', 'rule of law', 'violence', 'crime' and 'democratization'.

Top 20 most cited articles listed in Scopus from search string version 1:

In addition, a randomised sample of 20 articles was reviewed. 7 of the 20 articles do not closely reflect theme of the SDG. These articles cover historical perspectives on warfare, social theory studies, theology, media and literature studies in the context of warfare. More articles were retrieved in the context of peace or violence. But these do not necessarily cover aspects that directly relate to targets of the SDG, e.g. perspectives of chaplaincy in WW1 or developments in media coverage of ETA attacks.

The first update has been relatively successful in removing articles that are published in the field of medicine, IT and others. This is also confirmed by the co-occurrence of terms, which shows that there is a better focus on keywords that relate to the targets of the SDG. Still, a relatively high number of hits were seen on articles that do not closely reflect the targets of the SDG. Articles on economic development or social theories are still retrieved by the updated search query, in part because these studies link to warfare / democracy / conflicts. Other articles are retrieved that do not closely reflect the targets of the SDG, but which cover a variety of studies (e.g. historical perspectives, literature studies, media studies) that are written in the context of conflicts or violence. Likewise, articles related to healthcare studies are still retrieved through hits on the keyword 'violence'. The analyses show that the search query has been improved, but further updates could help improve the search query to enable the user to primarily retrieve articles that closely reflect the SDG.

Update 2) A second update was conducted by narrowing down existing keywords and by adding keywords to enhance the coverage of the targets of the SDG.

The table below summarises the different targets of the SDG and the keywords that were identified that could potentially help retrieve more articles that relate to these specific targets.

Target	Keywords to be added
Significantly reduce all forms of violence and related death rates everywhere	Extremism {war crime} {peaceful society}
End abuse, exploitation, trafficking and all forms of violence against and torture of children	Included
Promote the rule of law at the national and international levels and ensure equal access to justice for all	Included
By 2030, significantly reduce illicit financial and arms flows , strengthen the recovery and return of stolen assets and combat all forms of organized crime	{organized crime} {illicit transfer} {illicit money} {arms trafficking} {cybercrime}
Substantially reduce corruption and bribery in all their forms	{insurgence}

Develop effective, accountable and transparent institutions at all levels	{democratic institution} {political instability}
Ensure responsive, inclusive, participatory and representative decision-making at all levels	{{political decision-making} AND (responsive OR inclusive OR participatory OR representative)) ; NOTE: it was decided to not merely use {decision-making} as a query term as this led hits to a large variety of topics, ranging from consumption behaviour to healthcare and engineering. Narrowed down to {political decision-making} to focus on institutional decision-making in a democracy
Broaden and strengthen the participation of developing countries in the institutions of global governance	(democrati?ation AND {financial aid}) → <i>added to query term (democrati?ation AND (institutional OR conflict OR decision-making OR society OR politics))</i>
By 2030, provide legal identity for all , including birth registration	Included
Ensure public access to information and protect fundamental freedoms , in accordance with national legislation and international agreements	{Aarhus Convention} {press freedom} {freedom of speech}
Strengthen relevant national institutions , including through international cooperation, for building capacity at all levels, in particular in developing countries, to prevent violence and combat terrorism and crime	Included
Promote and enforce non-discriminatory laws and policies for sustainable development	Included

Rationale for edits to the existing search keywords:

<u>query term</u>	<u>decision</u>	<u>rationale</u>
Democrati?ation	Changed to (democrati?ation AND (institutional OR conflict OR decision-making OR society OR politics))	Narrowed down as 'democrati?ation' led to hits on articles ranging from IT to medical engineering, which do not closely reflect the theme of the SDG. Narrowed down to reduce irrelevant hits and to place a better emphasis on the retrieval of articles related to the SDG.
{conflict management}	Changed to {peacekeeping}	{conflict management} led to hits on articles in the fields of decision-making and healthcare. Changed to {peacekeeping} to reduce hits on irrelevant articles
{social justice}	Deleted	Led to hits on articles in a broader field of inequality and not necessarily violence / conflict related articles
{birth registration}	Deleted	Too broad as it primarily leads to hits on healthcare studies
{rule of law}	Changed to {effective rule of law}	Narrowed down to include hits on the targets of the SDG and to reduce hits on irrelevant articles, primarily in the field of economics

Updated search string (second update): 153,542 document results

TITLE-ABS-KEY (({actual innocence} OR {false confession} OR {armed conflict} OR {armed conflicts} OR {civil conflict} OR {civil conflicts} OR (war AND (conflict OR warfare OR democracy OR {Geneva Convention} OR treaty OR peace)) OR {peacekeeping} OR (corruption AND ({institution} OR {public official} OR {government} OR {bribery} OR {conflict})) OR crime OR crimes OR criminal OR {democratic deficit} OR (democrati?ation AND (

The results of the updated search were reviewed to check whether they aligned closely with the SDG theme.

The updated search returned 153,542 document results, compared to 164,675 document results for the original search.

The top 20 most cited articles were reviewed. Eight of the 20 articles do not closely reflect the theme of the SDG. The top 20 cited has slightly changed compared to the previous update. Several irrelevant articles are removed by the updated search query, three new irrelevant articles were added to the top 20. These articles cover topics in the field of economic development, healthcare, IT, decision-making sciences and engineering. The majority of the eight articles use insights, touch upon or partly cover the topics of the SDG. However, the overall focus of these articles lay on irrelevant topics such as healthcare practices or IT. Therefore, these are considered to be irrelevant.

In addition, a randomised sample of 20 articles was reviewed. Five of the 20 articles do not closely reflect the theme of the SDG. Three articles covered topics that directly relate to the theme of the SDG, e.g. forensic sciences or terrorism, however with a focus on animal forensics and taboos on mourning. The same goes for historical perspectives without a clear outline of implications for the contemporary age. Therefore, these do not closely reflect the theme of the SDG. The other two articles are published in the field of healthcare and food sciences.

The second update has partly removed articles that do not closely reflect the theme of the SDG, as shown by the final comparative analysis. The other analyses, especially the analysis of the top 20 most cited articles, show that irrelevant articles are still retrieved. Due to the high variability of the topics covered by these articles, it will be difficult to exclude them all from the document results. This is made even more difficult as these articles regularly use insights from fields that are relevant for the SDG, which explains why these are retrieved by the search query, but which show an overall focus on aims and topics that do not match the theme of the SDG. The close relation of the targets of the SDG with other topics hampers the opportunity to provide clear steps forward towards the retrieval of more relevant document results. However, it should also be noted that the analysis of the randomised sample of 20 articles shows that primarily relevant articles are retrieved if one does not use the most cited articles. This is confirmed by the co-occurrence of terms, which shows that the targets of the SDG are adequately covered and often directly relate to the theme of the SDG. It is therefore assumed that the updated search query provides an important update compared to the original search query.
