

SDG3: Ensure healthy lives and promote well-being for all at all ages

SUMMARY

Original search string: 3,467,510 document results

TITLE-ABS-KEY((((human AND health*) OR (human AND disease*) OR {battered child syndrome} OR {body dissatisfaction} OR {body image} OR {body ideals} OR {body ideal} OR bullying OR {cardiovascular disease} OR {cardiovascular diseases} OR {chagas} OR {child abuse} OR {child neglect} OR {child well-being index} OR {youth well-being index} OR {child wellbeing index} OR {youth wellbeing index} OR {child well being index} OR {youth well being index} OR {water-borne disease} OR {water-borne diseases} OR {water borne disease} OR {water borne diseases} OR {tropical disease} OR {tropical diseases} OR {chronic respiratory disease} OR {chronic respiratory diseases} OR {infectious disease} OR {infectious diseases} OR {sexually-transmitted disease} OR {sexually transmitted disease} OR {sexually-transmitted diseases} OR {sexually transmitted diseases} OR {communicable disease} OR {communicable diseases} OR illness* OR AIDS OR HIV OR {human immunodeficiency virus} OR {anti-retroviral therapy} OR tuberculosis OR malaria OR hepatitis OR polio* OR vaccin* OR immuni* OR cancer* OR diabet* OR (human AND mortality) OR {maternal mortality} OR {child mortality} OR {childbirth complications} OR {neonatal mortality} OR {neo-natal mortality} OR {premature mortality} OR {infant mortality} OR {infant death} OR (human AND death*) OR (human AND morbidity) OR {adjusted life year} OR {adjusted life years} OR {maternal health} OR {maternal death} OR {child death} OR {neonatal death} OR {neo-natal death} OR {premature death} OR {maternal deaths} OR {child deaths} OR {neonatal deaths} OR {neo-natal deaths} OR {premature deaths} OR {infant deaths} OR {preventable death} OR {preventable deaths} OR {tobacco control} OR {substance abuse} OR {drug abuse} OR {tobacco use} OR medicin* OR DOHA OR {alcohol use} OR {substance addiction} OR {drug addiction} OR {tobacco addiction} OR {alcohol addiction} OR alcoholism OR suicid* OR {postnatal depression} OR {post-natal depression} OR {post natal depression} OR zika OR ZIKV OR dengue OR plasmodium OR schistosomiasis OR {sleeping sickness} OR ebola OR {mental health} OR {mental disease} OR {mental diseases} OR {mental illness} OR {mental illnesses} OR {measles} OR {neglected disease} OR {neglected diseases} OR {diarrhoeal disease} OR {diarrhoeal diseases} OR {diarrheal disease} OR {diarrheal diseases} OR diarrhea OR diarrhoea OR cholera OR dysentery OR typhoid OR {traffic accident} OR {traffic accidents} OR {road accident} OR {road accidents} OR {healthy lifestyle} OR wellness OR {healthy life} OR {life expectancy} OR {life expectancies} OR {healthcare} OR {health care} OR {health policy} OR {health system} OR {health systems} OR {health risk} OR {health risks} OR {inclusive health} OR obesity OR {social determinants of health} OR {acculturative stress} OR {adolescent health} OR Eudaimonia OR eudaemonia OR eudemonia OR {psychological harm} OR {psychological wellbeing} OR {psychological well-being} OR {psychological well being} OR {public health} OR {health coverage} OR {health cover} OR {World Health Organization} OR {World Health Organisation}))) AND PUBYEAR BEF 2018 AND PUBYEAR AFT 2012

Graphical summary of co-occurrence of terms from 2000 randomly selected results:

The high number of document results retrieved by the search query led to a time out when using the SDG tool, no randomised sample could be drawn from the total document results. However, it was possible to draw a sample from the document that are published in 2013. It was not possible to draw a randomised sample from any of the other years within the timeframe, again because there are too many document results and this causes a timeout. It is assumed that there will be no major differences in topics and overall trends between articles published in 2013 and other years within the timeframe. This approach was taken for all the randomised samples drawn from the document results; for the co-occurrence of terms and the randomised sample of 20 articles (for the original query and the updated query).

PROCESS

The first stage of this review was to compare the original search string to the targets listed under the Sustainable Development Goal (SDG).

SDG targets listed here: <https://sustainabledevelopment.un.org/sdg3>

The purpose of this stage was to understand whether the Scopus results correctly reflected the theme of the SDG. The SDGs were unanimously agreed by member states of the United Nations, with very deliberate language and scope/ exclusions, so the results of this analysis should accurately reflect the specific SDG themes.

SDG 3 aims to promote **global human health, increase life expectancy and promote well-being**. It specifically aims to **reduce maternal, neonatal and under-five mortality**. **Premature mortality** caused by suicide and non-communicable disease such as cardiovascular disease, cancer, diabetes and chronic respiratory disease should be reduced. **Mortality and injuries induced by road traffic accidents** should be reduced, as well as mortality and illnesses caused by **hazardous chemicals, and air, water and soil pollution and contamination**. **Epidemics of AIDS, TBC, malaria and other tropical diseases** should be ended, and incidences of **hepatitis, water-borne disease and other communicable disease should be combatted**.

In addition to a reduction of mortality rates and incidences of diseases, **universal health coverage is promoted**, including access to health-care, medicine, vaccines and financial risk protection.

Treatment interventions are promoted to end substance abuse (e.g. drugs or alcohol) and to promote **mental health and well-being**. **Access to sexual and reproductive health-care services**, including family planning and education, are specifically promoted.

A Scopus search was conducted using the original search string. This returned 3,467,510 document results.

The top 20 most cited articles were reviewed. Four of the 20 articles do not closely reflect the theme of the SDG. These are all related to medical sciences and research, but do not closely reflect the theme of the SDG regarding the improvement of human health and well-being. Two articles cover topics on genetic engineering, one article covers ethical guidelines in medical research and one article covers an in-depth study on sexual behaviour, genetic contribution to offspring and evolutionary mechanisms.

Top 20 most cited articles listed in Scopus from the original search string:

***red text shows articles which do not closely match the theme of the SDG**

A random sample was drawn from the article publications in 2013. Six of the 20 articles do not closely reflect the theme of the SDG. All the articles cover topics that one way or another relate to medical sciences: hospital hygiene and information procedures, biomedical extensions or veterinary sciences.

Randomised sample of 20 articles listed in Scopus from the original search query:

*red text shows articles which do not closely match the theme of the SDG

Reflection on subject areas that should be excluded (incl. pie charts)

Documents by subject area

The findings of the analyses are confirmed by the analysis of the general document results. About half of the documents relate to the field of 'Medicine', with 'Biochemistry, Genetics and Molecular Biology' and 'Other' being the second and third largest field from which documents are retrieved. It appears that the original search query is already quite successful in retrieving articles that are closely related to the theme of the SDG. It should be noted that whereas the field of 'Biochemistry, Genetics and Molecular Biology' could provide relevant results, the analysis of the top 20 most cited also shows that some articles from these fields do not closely reflect the theme of the SDG, e.g. genetic engineering. The 'Other' field also provides several relevant articles from subfields 'Health Professions', but it also includes fields such as 'Chemistry' or 'Computer Science' which are not directly relevant for this SDG.

Given that the search query retrieves such large number of documents results, the search query contains keywords that are not directly related to targets of the SDG, and several non-relevant articles were found, a cleaning up process is advisable.

Update 1) The search keywords were edited to remove the broader search terms, or to make them more specific by combining with other search keywords.

The main purpose of this update is to clean up the query by removing similar keywords, by removing keywords that do not strictly lead to results that relate to the targets of the SDG and to narrow down keyword where needed.

Original search string: 3,467,510 document results

TITLE-ABS-KEY((((human AND health*) OR (human AND disease*) OR {battered child syndrome} OR {body dissatisfaction} OR {body image} OR {body ideals} OR {body ideal} OR bullying OR {cardiovascular disease} OR {cardiovascular diseases} OR {chagas} OR {child abuse} OR {child neglect} OR {child well-being index} OR {youth well-being index} OR {child wellbeing index} OR {youth wellbeing index} OR {child well being index} OR {youth well being index} OR {water-borne disease} OR {water-borne diseases} OR {water borne disease} OR {water borne diseases} OR {tropical disease} OR {tropical diseases} OR {chronic respiratory disease} OR {chronic respiratory diseases} OR {infectious disease} OR {infectious diseases} OR {sexually-transmitted disease} OR {sexually transmitted disease} OR {sexually-transmitted diseases} OR {sexually transmitted diseases} OR {communicable disease} OR {communicable diseases} OR illness* OR AIDS OR HIV OR {human immunodeficiency virus} OR {anti-retroviral therapy} OR tuberculosis OR malaria OR hepatitis OR polio* OR vaccin* OR immuni* OR cancer* OR diabet* OR (human AND mortality) OR {maternal mortality} OR {child mortality} OR {childbirth complications} OR {neonatal mortality} OR {neo-natal mortality} OR {premature mortality} OR {infant mortality} OR {infant death} OR (human AND death*))

OR (human AND morbidity) OR {adjusted life year} OR {adjusted life years} OR {maternal health} OR {maternal death} OR {child death} OR {neonatal death} OR {neo-natal death} OR {premature death} OR {maternal deaths} OR {child deaths} OR {neonatal deaths} OR {neo-natal deaths} OR {premature deaths} OR {infant deaths} OR {preventable death} OR {preventable deaths} OR {tobacco control} OR {substance abuse} OR {drug abuse} OR {tobacco use} OR medicin* OR DOHA OR {alcohol use} OR {substance addiction} OR {drug addiction} OR {tobacco addiction} OR {alcohol addiction} OR alcoholism OR suicid* OR {postnatal depression} OR {post-natal depression} OR {post natal depression} OR zika OR ZIKV OR dengue OR plasmodium OR schistosomiasis OR {sleeping sickness} OR ebola OR {mental health} OR {mental disease} OR {mental diseases} OR {mental illness} OR {mental illnesses} OR {measles} OR {neglected disease} OR {neglected diseases} OR {diarrhoeal disease} OR {diarrhoeal diseases} OR {diarrheal disease} OR {diarrheal diseases} OR diarrhea OR diarrhoea OR cholera OR dysentery OR typhoid OR {traffic accident} OR {traffic accidents} OR {road accident} OR {road accidents} OR {healthy lifestyle} OR wellness OR {healthy life} OR {life expectancy} OR {life expectancies} OR {healthcare} OR {health care} OR {health policy} OR {health system} OR {health systems} OR {health risk} OR {health risks} OR {inclusive health} OR obesity OR {social determinants of health} OR {acculturative stress} OR {adolescent health} OR Eudaimonia OR eudaemonia OR eudemonia OR {psychological harm} OR {psychological wellbeing} OR {psychological well-being} OR {psychological well being} OR {public health} OR {health coverage} OR {health cover} OR {World Health Organization} OR {World Health Organisation})) AND PUBYEAR BEF 2018 AND PUBYEAR AFT 2012

Rationale for edits to the search keywords:

<u>query term</u>	<u>decision</u>	<u>rationale</u>
{human AND health*}	Changed to {human AND (health* OR disease* OR illness* OR medicine* OR mortality)}	Restructured the query by adding several existing keywords to this query term and deleting them elsewhere
{human AND disease*}	Deleted	See {human AND health*}
{body dissatisfaction}	Deleted	Although mental health is part of one target regarding suicide and mental wellbeing, this keyword seems a bit too far off. The keyword 'suicide' is part of the query and seems proficient to cover this target in combination with other keywords such as mental health.
{body image}	Deleted	Although mental health is part of one target regarding suicide and mental wellbeing, this keyword seems a bit too far off. The keyword 'suicide' is part of the query and seems proficient to cover this target in combination with other keywords such as mental health.
{body ideals}	Deleted	Although mental health is part of one target regarding suicide and mental wellbeing, this keyword seems a bit too far off. The keyword 'suicide' is part of the query and seems proficient to cover this target in combination with other keywords such as mental health.
{body ideal}	Deleted	Although mental health is part of one target regarding suicide and mental wellbeing, this keyword seems a bit too far off. The keyword 'suicide' is part of the query and seems proficient to cover this target in combination with other keywords such as mental health.
bullying	Deleted	Although mental health is part of one target regarding suicide and mental wellbeing, this keyword seems a bit too far off. The keyword 'suicide' is part of the query and seems

		proficient to cover this target in combination with other keywords such as mental health.
{child well being index}	Deleted	Sufficiently covered by the two variants: {child well-being index} {child wellbeing index}
{youth well being index}	Deleted	Sufficiently covered by the two variants: {child well-being index} {child wellbeing index}
Illness*	Deleted	See {human AND health*}
Immuni*	Deleted	Also leads to hits in the field of genetic engineering, which is not closely related to the theme of the SDG. Relevant articles brought up by this keyword are assumed to be brought up by other keywords in this query (keywords on diseases, etc)
{anti-retroviral therapy}	Deleted	Therapy for HIV / AIDS should come up when using keywords for the disease itself, deleted to clean up the query
(human AND mortality)	Deleted	See {human AND health*}
{infant death}	Deleted	Various keywords for infant mortality in the query, deleted to clean up the query
human AND death*)	Deleted	Various keywords for human mortality in the query, deleted to clean up the query
human AND morbidity)	Deleted	Various keywords for human mortality in the query, deleted to clean up the query
{adjusted life year}	Changed to {quality adjusted life year}	A more common term to indicate the effect of disease burden on one's life
{adjusted life years}	Deleted	Deleted as the more regular term {quality adjusted life year} has been added
{maternal death}	Deleted	Covered by query term {maternal mortality}, 'mortality' seems to be a more common key word to indicate death in scientific studies
{child death}	Deleted	Covered by query term {child mortality}, 'mortality' seems to be a more common key word to indicate death in scientific studies
{neonatal death}	Deleted	Covered by query term {neonatal mortality}, 'mortality' seems to be a more common key word to indicate death in scientific studies
{neo-natal death}	Deleted	Covered by query term {neo-natal mortality}, 'mortality' seems to be a more common key word to indicate death in scientific studies
{premature death}	Deleted	Covered by query term {premature mortality}, 'mortality' seems to be a more common key word to indicate death in scientific studies
{maternal deaths}	Deleted	Covered by query term {maternal mortality}, 'mortality' seems to be a more common key word to indicate death in scientific studies
{child deaths}	Deleted	Covered by query term {child mortality}, 'mortality' seems to be a more common key word to indicate death in scientific studies
{premature deaths}	Deleted	Covered by query term {premature mortality}, 'mortality' seems to be a more common key word to indicate death in scientific studies
{infant deaths}	Deleted	Covered by query term {infant mortality}, 'mortality' seems to be a more common key word to indicate death in scientific studies
Medicine*	Deleted	See {human AND health*}
DOHA	Deleted	Unclear what the term means, this leads to hits on IT, terrorism, etc, therefore deleted

{alcohol addiction}	Deleted	Returns results on alcoholism, which makes the keyword 'alcoholism' sufficient
{post natal depression}	Deleted	Brings up the same results as {postnatal depression}, and in addition a bulk of irrelevant results, deleted
Zika	Changed to {zika virus}	Brought up results on chemistry, social sciences, etc. Narrowed down to {zika virus}
ZIKV	Deleted	Abbreviation for zika virus, the latter is now included in the query
Plasmodium	Deleted	Parasite that causes malaria; deleted as 'malaria' is already in the query
{mental disease}	Changed to {mental disorder}	More common term encompassing both disease and illnesses
{mental diseases}	Deleted	Deleted as {mental disorder} is now included
{diarrheal disease}	Deleted	Deleted to clean up the query as 'diarrhea' and keywords related to diarrheal diseases are in the query
{diarrheal diseases}	Deleted	Deleted to clean up the query as 'diarrhea' and keywords related to diarrheal diseases are in the query
typhoid	Changed to {typhoid fever}	'Typhoid' gave random results in the field of veterinary sciences, genetics, etcetera. Narrowed down to {typhoid fever}
{road accident}	Deleted	Deleted as it generates results similar to 'traffic accident'; traffic accident is a keyword that generates more broader results on traffic accident (not merely incidents classified as road incidents), hence deleted
{road accidents}	Deleted	Deleted as it generates results similar to 'traffic accident'; traffic accident is a keyword that generates more broader results on traffic accident (not merely incidents classified as road incidents), hence deleted
wellness	Deleted	Broad keyword, generates a variety of (irrelevant) results, deleted
{healthy life}	Deleted	Broad keyword, generates a variety of (irrelevant) results, deleted
{health care}	Deleted	Should come up using any of the other queries, too broad on its own
{adolescent health}	Deleted	Query term is related to query terms on disease, health, mortality and wellbeing. Deleted to clean up the query
{acculturative stress}	Deleted	Results will also be found by query term {mental disorder}, deleted to clean up the query
Eudaimonia	Deleted	Could be translated in many terms such as happiness, living well. Seems too broad for this query and leads to multiple (irrelevant) articles on personalities, values, etc. Relevant articles will be found by using the keyword {mental disorder}
eudaemonia	Deleted	Could be translated in many terms such as happiness, living well. Seems too broad for this query and leads to multiple (irrelevant) articles on personalities, values, etc. Relevant articles will be found by using the keyword {mental disorder}
eudemonia	Deleted	Could be translated in many terms such as happiness, living well. Seems too broad for this query and leads to multiple (irrelevant) articles

		on personalities, values, etc. Relevant articles will be found by using the keyword {mental disorder}
{healthcare}	Deleted	Should come up using any of the other queries, too broad on its own
{health system}	Changed to {health system} AND (access OR accessible)	Narrowed down to cover the access to health target
{health systems}	Deleted	Deleted to clean up the query, see {health system}
{health cover}	Deleted	Deleted, covered by health system and meaningless term on its own
{health coverage}	Deleted	Deleted, covered by health system and meaningless term on its own
{World Health Organization}	Deleted	Will lead to studies funded by the WHO, not necessarily with topics related to the SDG.
{World Health Organisation}	Deleted	Will lead to studies funded by the WHO, not necessarily with topics related to the SDG.

Updated search string (first update): 3,157,306 document results

TITLE-ABS-KEY (((human AND (health* OR disease* OR illness* OR medicine* OR mortality)) OR {battered child syndrome} OR {cardiovascular disease} OR {cardiovascular diseases} OR {chagas} OR {child abuse} OR {child neglect} OR {child well-being index} OR {youth well-being index} OR {child wellbeing index} OR {youth wellbeing index} OR {water-borne disease} OR {water-borne diseases} OR {water borne disease} OR {water borne diseases} OR {tropical disease} OR {tropical diseases} OR {chronic respiratory disease} OR {chronic respiratory diseases} OR {infectious disease} OR {infectious diseases} OR {sexually-transmitted disease} OR {sexually transmitted disease} OR {sexually-transmitted diseases} OR {sexually transmitted diseases} OR {communicable disease} OR {communicable diseases} OR aids OR hiv OR {human immunodeficiency virus} OR tuberculosis OR malaria OR hepatitis OR polio* OR vaccin* OR cancer* OR diabet* OR {maternal mortality} OR {child mortality} OR {childbirth complications} OR {neonatal mortality} OR {neo-natal mortality} OR {premature mortality} OR {infant mortality} OR {quality adjusted life year} OR {maternal health} OR {preventable death} OR {preventable deaths} OR {tobacco control} OR {substance abuse} OR {drug abuse} OR {tobacco use} OR {alcohol use} OR {substance addiction} OR {drug addiction} OR {tobacco addiction} OR alcoholism OR suicid* OR {postnatal depression} OR {post-natal depression} OR {zika virus} OR dengue OR schistosomiasis OR {sleeping sickness} OR ebola OR {mental health} OR {mental disorder} OR {mental illness} OR {mental illnesses} OR {measles} OR {neglected disease} OR {neglected diseases} OR diarrhea OR diarrhoea OR cholera OR dysentery OR {typhoid fever} OR {traffic accident} OR {traffic accidents} OR {healthy lifestyle} OR {life expectancy} OR {life expectancies} OR {health policy} OR ({health system} AND (access OR accessible)) OR {health risk} OR {health risks} OR {inclusive health} OR obesity OR {social determinants of health} OR {psychological harm} OR {psychological wellbeing} OR {psychological well-being} OR {psychological well being} OR {public health})) AND PUBYEAR < 2018 AND PUBYEAR > 2012

The results of the updated search were reviewed to check whether they aligned closely with the SDG theme.

The updated search returned 3,196,745 document results, compared to 3,467,510 document results for the original search.

The top 20 most cited articles were reviewed. Two articles do not closely reflect the theme of the SDG, these articles cover ethics and evolutionary studies.

Top 20 most cited articles listed in Scopus from search string version 1:

***red text shows articles which do not closely match the theme of the SDG**

In addition, a randomised sample of 20 articles (published in 2013) was reviewed. Two articles do not closely reflect the theme of the SDG. One covers nutrient cycling in wetlands, the other covers the use of ICT in education.

Randomised sample of 20 articles listed in Scopus from search string version 1:

*red text shows articles which do not closely match the theme of the SDG

Title	Year	Source title	Cited by	EID
Improved evaluation of calcified segments on coronary CT angiography: A feasibility study of coronary calcium subtraction	2013	International Journal of Cardiovascular Imaging	32	2-s2.0-84892969791
Emotional Reactivity and Exposure to Household Stress in Childhood Predict Psychological Problems in Adolescence	2013	Journal of Youth and Adolescence	13	2-s2.0-84884352582
Wetland technologies for nursery and greenhouse compliance with nutrient regulations	2013	HortScience	13	2-s2.0-84884915879
Identifying patients at risk for recurrent or advanced BCC	2013	Journal of Drugs in Dermatology	8	2-s2.0-84887935562
Endoscopic and clinicopathological patterns of esophageal cancer in Tanzania: Experiences from two tertiary health institutions	2013	World Journal of Surgical Oncology	8	2-s2.0-84884953779
High-dose-rate endorectal brachytherapy for locally advanced rectal cancer in previously irradiated patients	2013	Brachytherapy	8	2-s2.0-84883555805
Kidney research national dialogue overview and commentary	2013	Clinical Journal of the American Society of Nephrology	7	2-s2.0-84883677341
The patient-reported incident in hospital instrument (PRIH-I): Assessments of data quality, test-retest reliability and hospital-level reliability	2013	BMJ Quality and Safety	7	2-s2.0-84882447877
Examining emotional modulation of pain and spinal nociception in Native Americans: A preliminary investigation	2013	International Journal of Psychophysiology	5	2-s2.0-84886952667
STD Vaccine Acceptability in Sexually Transmitted Diseases	2013	Sexually Transmitted Diseases	5	2-s2.0-84882873997
The impact of rheumatoid arthritis on the economic situation of Polish households	2013	Reumatologia	3	2-s2.0-84891367021
College men, unplanned pregnancy, and marriage: What do they expect?	2013	Journal of Sex Research	3	2-s2.0-84886648070
Combination of pharmacophore hypothesis, genetic function approximation model, and molecular docking to identify novel inhibitors of S6K1	2013	Molecular Diversity	3	2-s2.0-84886098338
[Diagnostic value of human neutrophil peptide in spontaneous bacterial peritonitis]	2013	Zhonghua gan zang bing za zhi = Zhonghua ganzangbing zazhi =	2	2-s2.0-84921952361

The new search results were compared to the original search results to check if the updated search was primarily removing irrelevant results.

Combining the second updated search with the original search using AND NOT function in Scopus resulted in 270,765 document results – i.e. the results that were excluded from the original search in the new query.

The top 20 most cited articles were reviewed. Five of the 20 articles that were excluded from the updated document results are relevant for the SDG. These articles provide input on a better understanding of the immune system for potential future disease treatment and practice guidelines.

Levels of selected carcinogens and toxicants in vapour from electronic cigarettes	2014	Tobacco Control	715	2-s2.0-84893908308
Interferon-stimulated genes: A complex web of host defenses	2014	Annual Review of Immunology	704	2-s2.0-84896987305

The updated search query removed a number of articles from the document results, but the total number of document results remains extremely high. This could be explained by the broad targets of the SDG, ranging from reducing disease mortality to supporting R&D on vaccines. In addition, the field of medical sciences is a broad and well-researched field. Studies can be on a general level, e.g. on policies or best practices, as well as on a more detailed level, e.g. cell level. Both types of studies are potentially relevant for this SDG as both support a strive towards more healthy lives, a lower mortality caused by specific diseases and a better well-being for all.

The analyses also show that the update has successfully excluded articles on genetical engineering and other fields. On the other hand, the update led to the exclusion of several articles on a better understanding of immunology and on practical guidelines for disease treatment. Still, the co-occurrence of terms shows that the theme of the SDG is adequately covered and that future users will be successful in retrieving articles that are related to the theme of the SDG.
