PROCESS

The first stage of this review was to compare the original search string to the targets listed under the Sustainable Development Goal (SDG).

SDG targets listed here: <https://sustainabledevelopment.un.org/sdg9>

The purpose of this stage was to understand whether the Scopus results correctly reflected the theme of the SDG. The SDGs were unanimously agreed by member states of the United Nations, with very deliberate language and scope/ exclusions, so the results of this analysis should accurately reflect the specific SDG themes.

SDG 9 promotes sustainable infrastructure and industrialisation. **Resilient, affordable, accessible and sustainable infrastructure** is promoted, ranging from regional to transborder infrastructure. **Inclusive and sustainable industrialization**, including employment within this sector, is promoted. **Small-scale industrial and other enterprises** should have access and should be **integrated in markets and value chains**. **Universal access to mobile networks and Internet** is key to achieve this target. **Energy efficiency and clean energy are promoted**, CO2 emissions should be reduced. Innovation and R&D should be promoted to enhance technological capabilities of industries, **industrial diversification** and **value addition**. **International support** should be provided to developing countries to achieve aforementioned targets.

A Scopus search was conducted using the original search string. This returned 337,382 document results.

The top 20 cited articles were reviewed. 19 of the 20 articles do not closely reflect the theme of the SDG. Most of these articles covered topics in the field of energy sciences (advancements in renewable energy which is covered by SDG 7). Other fields that are not relevant for this SDG but which were found in the top20 cited are: physics, environmental sciences, healthcare and ecology. Four keywords were found that led to the retrieval of these articles: 'technological development', 'manufacturing', 'transportation' and 'industrialization'.

Top 20 most cited articles listed in Scopus from the original search string:

*red text shows articles which do not closely match the theme of the SDG

Title	Year	Source title	Cited by	EID
Van der Waals heterostructures	2013	Nature	3840	2-s2.0-84881167566
Interface engineering of highly efficient perovskite solar cells	2014	Science	3765	2-s2.0-84905902495

Reflection on subject areas that should be excluded (incl. pie charts)

Documents by subject area

Documents by subject area

The general analysis of the document results confirms the findings of the previous analyses. It also shows that articles from a large variety of fields are retrieved. 'Engineering' takes up a quarter of the document results, some of these articles will be relevant for the SDG but the analyses also show that articles are included that are not related to this SDG. Disregarding the 'Other' field, 'Computer sciences' is the second largest field. This field is seen to provide relevant articles on innovations in manufacturing processes and transport systems. The 'Other' field relates to about 20% of the articles retrieved, but the largest subfields appear to be relevant to multiple targets of the SDG. The analyses, and the co-occurrence of the keywords, show that the search query already retrieves a number of relevant articles but major improvements can be made. The first step will be to narrow down keywords to exclude the majority of energy sciences and non-relevant engineering articles.

Update 1) The search keywords were edited to remove the broader search terms, or to make them more specific by combining with other search keywords.

Original search string: 337,358 document results

TITLE-ABS-KEY(((industrial development} OR {industrial growth} OR {industrial diversification} OR industrialization OR {infrastructural development} OR {industrial hygiene} OR {industrial safety} OR {infrastructural investment} OR {infrastructure investment} OR {public infrastructure} OR {resilient infrastructure} OR {transborder infrastructure} OR {public infrastructures} OR {resilient infrastructures} OR {transborder infrastructures} OR {industrial pollution} OR {industrial waste management} OR {industrial waste treatment} OR congestion OR microenterprise* OR micro-enterprise* OR {small enterprise} OR {medium enterprise} OR {small enterprises} OR {medium enterprises} OR {small entrepreneur} OR {medium entrepreneur} OR {small entrepreneurs} OR {medium entrepreneurs} OR {structural equity} OR {value-add} OR {value add} OR {value-addition} OR {value addition} OR {internet access} OR manufacturing OR transportation OR {R&D} OR {green product} OR {green products} OR {green process} OR {green processes} OR (innovation AND industry) OR (innovation AND economy) OR {innovative process} OR {innovative processes} OR {inclusive innovation} OR {technological development}))) AND PUBYEAR BEF 2018 AND PUBYEAR AFT 2012

Rationale for edits to the search keywords:

query term	decision	rationale
{industrial development}	Deleted	Deleted as it brings up a variety of articles related to chemistry, climate change etc, as it is a keyword that is regularly used to describe processes induced by this

		keyword, deleted as development is already part of {industrial growth} {industrial diversification} {value chain management} and keywords related to innovation
industrialization	Deleted	Too broad as a keyword on its own and led to hits on articles that do not relate to either of the targets
{industrial hygiene}	Deleted	Primarily relates to healthcare and issues induced by emissions, not necessarily related to innovation
{industrial safety}	Deleted	Retrieves a large variety of articles unrelated to the SDG, deleted as safety is not a target of the SDG
{industrial pollution}	Changed to ({industrial emissions} AND mitigation)	Narrowed down to focus on mitigation, as this is one of the targets. {industrial pollution} also leads to hits on articles regarding healthcare and ecology
congestion	Changed to {traffic congestion}	Narrowed down as {congestion} led to a large number of hits on IT related articles
{internet access}	Changed to ({broadband access} AND {developing countries})	{internet access} is quite broad and does not necessarily relate to access to Internet in developing countries, narrowed down to include a query term on the target on universal internet access
{structural equity}	Deleted	The keyword is not related to industrialisation specifically, deleted
{value-add}	Changed to {value chain management}	Changed as {value-add} brings up all types of results that are not related to the SDG. {value chain management} relates to value added through a supply chain, as well as to advancements made in such supply chain, which is more closely related to the SDG
{value add}	Deleted	Too broad, see {value-add}
{value-addition}	Deleted	Too broad, see {value-add}
{value addition}	Deleted	Too broad, see {value-add}
manufacturing	Changed to {manufacturing innovation} OR {manufacturing investment}	Too broad on its own, narrowed down to include results on investments made / value addition / innovation in manufacturing processes
transportation	Changed to {sustainable transportation} {accessible transportation} {transportation services} {inclusive transportation}	Too broad on its own, narrowed down to keywords that are directly related to the targets of the SDG
{R&D}	Changed to {R&D investment}	Too broad, this leads to a large variety of article hits, in part due to hits on R&D departments that published respective articles. Narrowed down to {R&D investment} to focus on articles that relate to the SDG's target on R&D
{green process}	Changed to {sustainable manufacturing} OR ({cradle to cradle} AND industry) OR {closed loop supply chain}	Too broadly defined, led to hits on articles published in numerous fields. Changed.
{green processes}	Deleted	Too broadly defined, led to hits on articles published in numerous fields. Deleted as this is already included in the change to {sustainable manufacturing} OR ({cradle to

		cradle} AND industry) OR {closed loop supply chain}
(innovation AND industry)	Changed to {industrial innovation}	Narrowed down to exclude articles on genetics, IT, etc
(innovation AND economy)	Deleted	Deleted to focus solely on innovation in industries by using the keyword {industrial innovation}
{innovative process}	Changed to {process innovation}	Slight difference, but this narrows it down to innovation of processes in for example manufacturing
{innovative processes}	Changed to {product innovation}	Narrowed down to innovation regarding adding value to products
{technological development}	Deleted	Deleted is the query term led to numerous hits on articles that were not relevant for the SDG, any type of innovation or advancements made should come up with other keywords

Updated search string (first update): 33,170 document results

TITLE-ABS-KEY (({industrial growth} OR {industrial diversification} OR {infrastructural development} OR {infrastructural investment} OR {infrastructure investment} OR {public infrastructure} OR {resilient infrastructure} OR {transborder infrastructure} OR {public infrastructures} OR {resilient infrastructures} OR {transborder infrastructures} OR ({industrial emissions} AND mitigation) OR {industrial waste management} OR {industrial waste treatment} OR {traffic congestion} OR microenterprise* OR micro-enterprise* OR {small enterprise} OR {medium enterprise} OR {small enterprises} OR {medium enterprises} OR {small entrepreneur} OR {medium entrepreneur} OR {small entrepreneurs} OR {medium entrepreneurs} OR {value chain management} OR ({broadband access} AND {developing countries}) OR {manufacturing innovation} OR {manufacturing investment} OR {sustainable transportation} OR {accessible transportation} OR {transportation services} OR {inclusive transportation} OR {R&D investment} OR {green product} OR {green products} OR {sustainable manufacturing} OR ({cradle to cradle} AND industry) OR {closed loop supply chain} OR (industrial AND innovation) OR {process innovation} OR {product innovation} OR {inclusive innovation})) AND PUBYEAR < 2018 AND PUBYEAR > 2012

The results of the updated search were reviewed to check whether they aligned closely with the SDG theme.

The updated search returned 33,170 document results, compared to: 337,382 document results for the original search.

The top 20 most cited articles were reviewed. Five of the 20 articles are not closely related to the theme of the SDG. These related to the field of IT, air pollution but without a clear relationship with industrial emissions or mitigation, and chemical engineering. These articles were retrieved by hits on the keywords 'industrial innovation', 'traffic congestion' and 'green product'.

Top 20 most cited articles listed in Scopus from search string version 1:

The analyses show that the update has been successful in removing the majority of document results published in fields that do not relate to the theme of the SDG. For example, the field of energy sciences and innovations regarding renewable energy technologies seems to be excluded. The co-occurrence of the keywords show that a greater emphasis is placed on three overarching topics within the SDG: innovation, transportation and Small Medium Enterprises (SMEs). Further emphasis could be placed on these topics and related targets by adding extra keywords.
